

Jacob Sanchez email re concerns:

The 30x30 Initiative was an Executive Order (N-82-20) put out in September 2020. If you would like to review it, I have it attached to this email.

The second section is what catches my attention, where it speaks on the goal of the State to conserve at least 30 percent of the Coastal waters by 2030.

This was actually then reinforced by Biden in January 2021.

Currently, there is no plan, as they need to formulate a plane.

I think Cen Cal should be a voice in this.

I definitely would appreciate your input and feedback at this next meeting.
